

Accident Analysis by Model

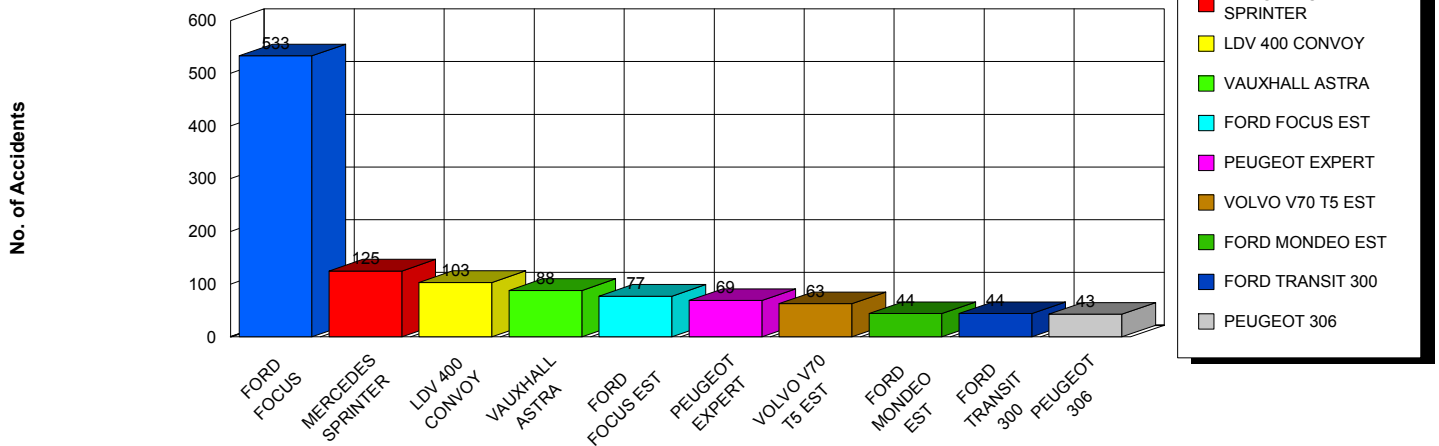

This report shows analysis by make/model of vehicle over your chosen date range. Blameworthy percentage is based on the number of accidents in that period. Please note that hired vehicles are also included in this report (if recorded). Accidents on hire vehicles are included in the 'No. of Accidents' column. However, they do not contribute to the 'Vehicles Owned' column. Double click and drill down to view a break down of accidents by type and then again to view the actual accident records.
