

Printed: 09/04/2008

Base the calculated average usage on the last 3 months sales.  
 No of Months to Stock: **2.00**  
 Show Sales Order Analysis? **No**  
 Show Purchase Order Analysis? **No**  
 Store Code selected is: **001**  
 Count negative stock quantities as zero? **Yes**  
 Show Zero Stock Required Items? **No**  
 Average supplier delivery lead time (Months)? **1.00**  
 Item Code Range from **0** to **01Z**.  
 Catalog Code from **001** to **999**.

www.PerthCrest.com.au

**Report Features:**

This report has many options when you run it.  
 It can display up to the last 6 months sales history for each item (prior year months cannot be shown so an average for the year is displayed).  
 It calculates an average sales quantity based on your choice of the last 1-6 periods.  
 It calculates a required stock holding based on the months you wish to keep.  
 Optionally, you can show existing purchase and sales orders.  
 It identifies any shortfalls and highlights and over stocking.  
 The report calculates a reorder level based on a global lead time entered, this is highlighted in red if it is 20% above or below the existing reorder level.  
 Ranging on Item Code and Catalog Code is available.  
 Note - Printing requires A3 size.
