

Job Costs by Repair Reason

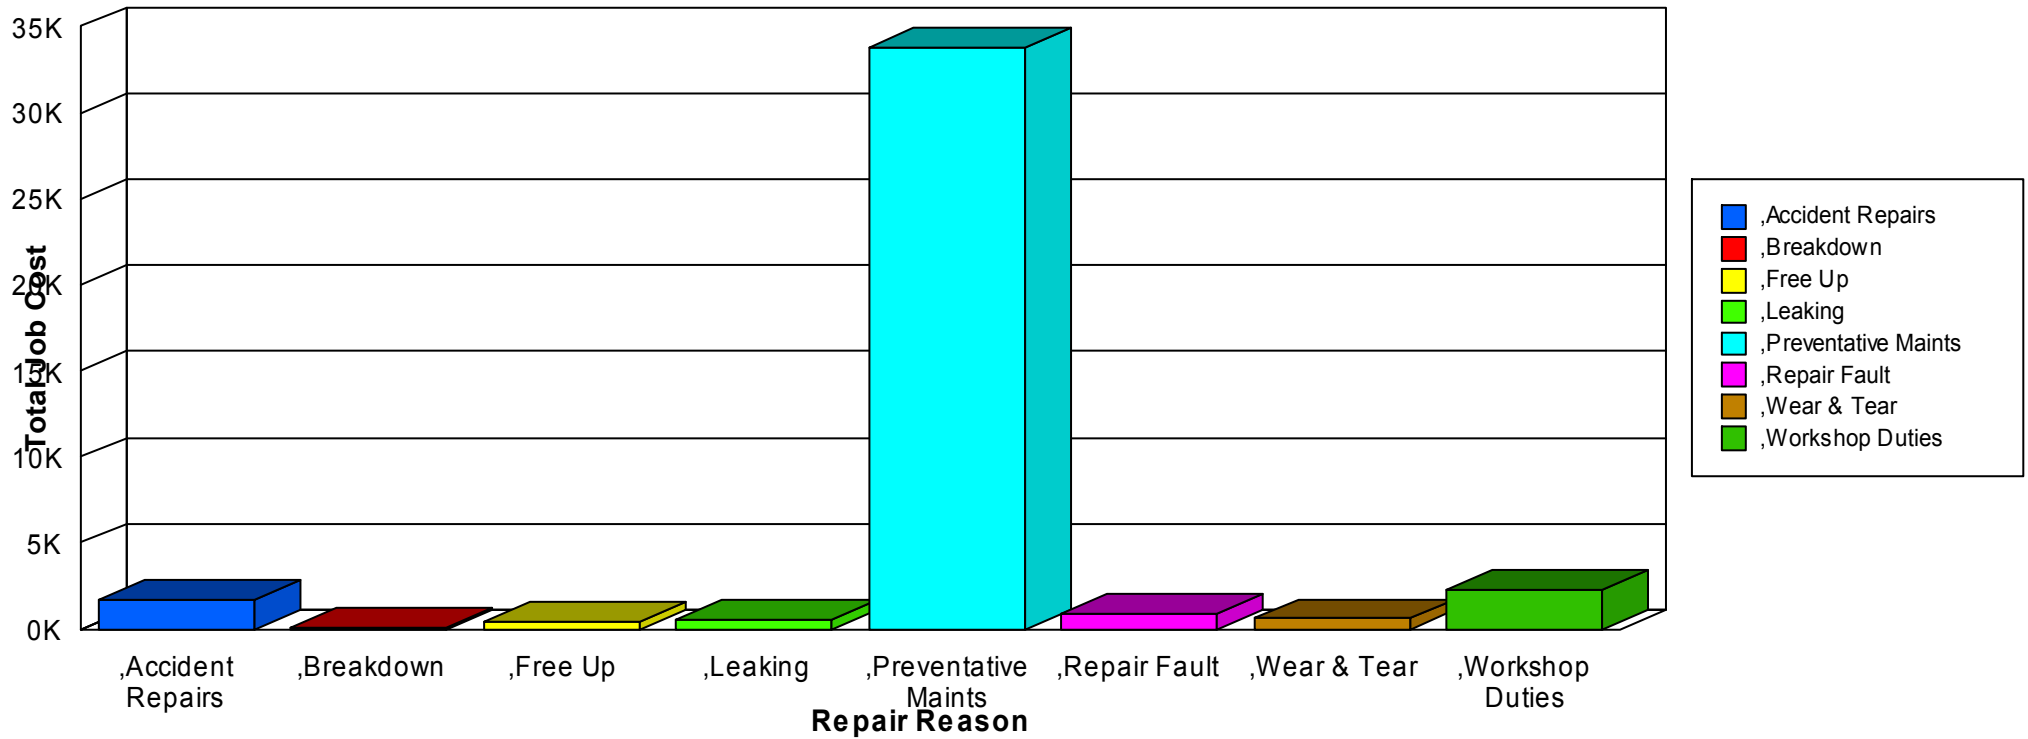

This report shows the job costs for the dates selected grouped by the repair reason from the labour records. This is useful if you are recording the reason for each individual repair on a job card. For example, you may carry out a service (reason:preventative maintenance) and then find additional work (reason:wear & tear or driver abuse or accident damage etc).

To see individual job costs for a particular reason just double click on the repair reason you are
